G5963 6" x 12" Surface Grinder w/ Stand

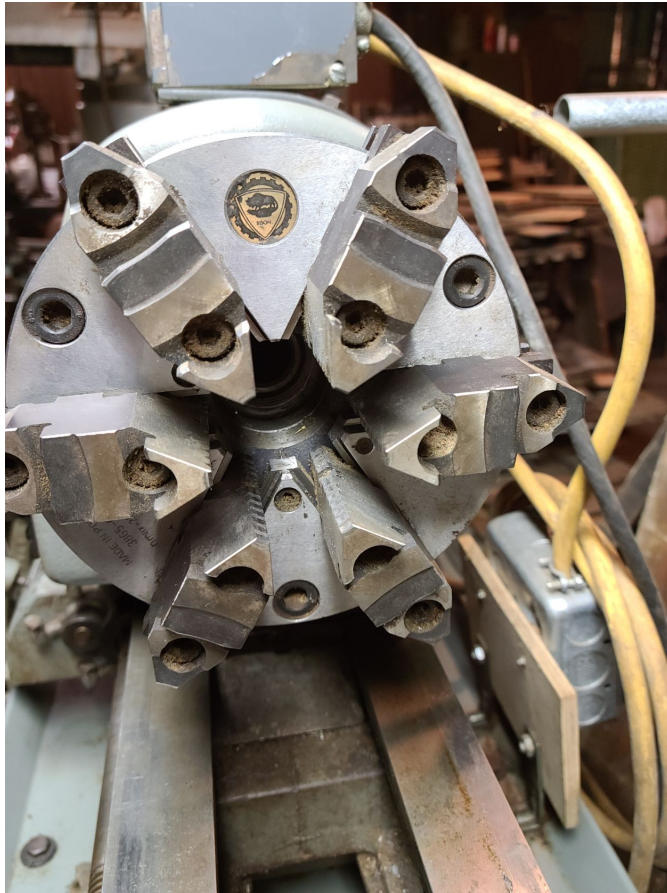

Precision grinding perfect for the small tool room and metalworking enthusiast.

The G5963 6" x 12" Surface Grinder allows you to resurface metallic workpieces to create high-tolerance flat surfaces.

Grinding operations are utilized by a table that moves on a horizontal plane and a grinding wheel that moves along a vertical axis....

Bison 6 inch Set Tru Chuck \$995 or OBO, Excellent condition

There are a number of clamps, end mills, cutters available also. There are a number of measurement tools, i.e. calipers, micrometers, rules and such also available.

I would like to thank the following forums for their assistance in understanding what my father had for tools: Marty from the <https://valleymetal.groups.io/>, <https://www.homemodelenginemachinist.com/>, <https://bbs.homeshopmachinist.net/>, <https://www.practicalmachinist.com/>, <https://www.hobby-machinist.com/> and <http://www.lathes.co.uk/index.html>. Great groups with some very helpful individuals who are passionate about promoting and assisting others interested in machine tools.
